IER, Mobility Solutions Partner of Choice for the City of the Future

IER, a specialist in electric vehicle charging infrastructure, unveils its new intelligent charging station at the 3rd Electric Mobility Conference in Lons-le-Saunier.

IER is the ideal partner for local authorities and businesses looking to make a successful transition to electric mobility. Established, since the 1980s in the Franc-Comtoise region since, the IER production site supports the biggest names in the industry and contributes to the region's influence in high-tech markets including transport, logistics, aeronautics and electro-mobility.

IER relies on local businesses skills to help its clients in different sectors: railway, transport, access control, air terminal, automation for public sector and charging stations for electric vehicles.

**SMART E-CHARGER
THE NEW SMART TERMINAL**

3rd Electric Mobility Conference
Tuesday, September 18th
Lons-le-Saunier

  

www.ier.com

The IER **SMART E-CHARGER** terminal is **the latest generation** of terminal designed for charging **all types of vehicles**, manufactured in Besançon. With a variety of product versions: **highway or parking** as well as a **smart charging solution** for the users in the public or private area, the Smart E-Charger has been developed in accordance with all the current security requirements and standards.

It is particularly suitable for **demanding urban environments** (corrosion, degradation) and **intensive use**. **2 charging points** allow charging of up to 2 vehicles simultaneously and the E-Charger provides **intuitive and fluid navigation** through coloured visual signage that guides the user through all stages of charging.

Come and meet IER and its new SMART E-CHARGER at the [3rd Electric Mobility conference](#) on Wednesday, September 18th, Place du 11 Novembre (CARCOM), in Lons-le-Saunier, and register for the round table on electric mobility organised by Bourgogne Franche-Comté Mobilité Electrique association from 3.30pm to 5.30pm.

About IER:

IER is the ideal partner for your mobility solutions: we offer a turnkey service which includes installation, repair and terminal maintenance. An expert in this sector since 2010, IER has more than 10.000 electric vehicle charging stations deployed in France and internationally. Its solid expertise in charging solutions has made IER major player in new mobility solutions. IER's solutions offer interoperability with all charging operators to ensure maximum adaptability.
